PROFFER CONDITION AMENDMENT (PCA), CONCEPTUAL DEVELOPMENT PLAN AMENDMENT (CDPA) AND FINAL DEVELOPMENT PLAN AMENDMENT (FDPA) (PCA/CDPA/FDPA #2005-PR-039) AND PROFFER CONDITION AMENDMENT (PCA), CONCEPTUAL DEVELOPMENT PLAN AMENDMENT (CDPA) AND FINAL DEVELOPMENT PLAN AMENDMENT (FDPA) (PCA/CDPA/FDPA CASE #88-P-030-2)

FOR

LAND UNIT A

DUNN LORING - MERRIFIELD METRO STATION

PROVIDENCE DISTRICT, FAIRFAX COUNTY, VIRGINIA

GENERAL NOTES

1. THE PROPERTIES DELINEATED HEREON ARE LOCATED ON FAIRFAX COUNTY TAX MAP #049-01-13-17A, ZONED PDC, TAX MAP #049-01-13-18A, ZONED PDC, TAX MAP #049-01-01-27A, ZONED PRM, TAX MAP #049-02-01-13A, ZONED PRM, AND TAX MAP #049-02-01-15A, ZONED PRM.
2. THE ABOVE REFERENCED PARCELS WILL BE CONSOLIDATED AND/OR RE-SUBDIVIDED AT THE TIME OF FINAL SITE PLAN.
3. THE BOUNDARY INFORMATION SHOWN HEREON WAS COMPILED BY URBAN ENGINEERING & ASSOCIATES, INC. (UEA).
4. THE TOPOGRAPHY SHOWN HEREON IS AT A TWO-FOOT CONTOUR INTERVAL, COMPILED BY UEA. ALL TOPOGRAPHY WAS OBTAINED VIA AIR SURVEY.
5. THE SITE SHOWN ON THIS PLAN IS LOCATED IN THE PROVIDENCE DISTRICT, THE ASA AND LOWER POTOMAC SANITARY SEWER DISTRICTS, AND THE ACCOTINK CREEK WATERSHED.
6. THIS PROPOSED DEVELOPMENT IS IN CONFORMANCE WITH THE COMPREHENSIVE PLAN AND ALL APPLICABLE ORDINANCES, REGULATIONS AND ADOPTED CONDITIONS WITH THE EXCEPTION OF THE FOLLOWING MODIFICATIONS AND WAIVERS APPROVED IN RZ/FDP 2005-PR-039 AND PCA/FDPA 88-P-030.
   - A MODIFICATION FOR ONSITE STORMWATER MANAGEMENT (SWM). SWM REQUIREMENTS WILL BE SATISFIED USING UNDERGROUND VAULTS AS DESCRIBED IN THE SWM NARRATIVE ON THIS SHEET.
   - A MODIFICATION OF THE PRIVATE STREET LIMITATIONS OF SECTION 11-302 OF THE FAIRFAX COUNTY ZONING ORDINANCE.
   - A MODIFICATION OF TRANSITIONAL SCREENING AND BARRIER REQUIREMENTS IN FAVOR OF THE LANDSCAPING SHOWN ON THE INCLUDED LANDSCAPE PLAN.
   - A MODIFICATION OF INTERIOR PARKING LOT LANDSCAPING ON THE TOP OF PARKING DECKS IN FAVOR OF MORE SUSTAINABLE LANDSCAPING AS SHOWN ON THE INCLUDED LANDSCAPE PLAN.
   - A WAIVER OF THE 75' YARD REGULATIONS FOR LOTS ABUTTING PRINCIPAL ATERIAL HIGHWAYS AS REQUIRED BY SECTION 2-414.1.B OF THE FAIRFAX COUNTY ZONING ORDINANCE. THE COMMERCIAL USES IMPACTED BY THIS RESTRICTION ARE THE SECONDARY USES LOCATED IN THE WMATA GARAGE. THESE USES ARE LOCATED MORE THAN 75' FROM INTERSTATE 66, BUT THE GARAGE AS-A-WHOLE IS NOT.

   AND, THE FOLLOWING MODIFICATION REQUESTED WITH THIS APPLICATION.
   - A MODIFICATION OF ZONING ORDINANCE SECTION 11-203 SUCH THAT A MAXIMUM OF 10 LOADING SPACES SHALL BE REQUIRED FOR THIS PROJECT.
7. THIS SITE IS SERVED BY PUBLIC SEWER AND WATER.
8. STORM WATER MANAGEMENT (SWM) AND BEST MANAGEMENT PRACTICES (BMP) REQUIREMENTS WILL BE PROVIDED AS DESCRIBED IN THE NARRATIVES ON THIS SHEET. THE SWM CHECKLIST IS PROVIDED ON SHEET #3.
9. UTILITY LOCATIONS SHOWN ARE APPROXIMATE. THERE ARE EXISTING UTILITY EASEMENTS OF 25' OR MORE IN WIDTH ON THE SITE.
10. INDIVIDUAL UTILITY PLANS AND PROFILES WILL BE SUBMITTED DURING THE SITE PLAN STAGE FOR CONSTRUCTION PURPOSES.
11. THERE ARE NO KNOWN HAZARDOUS OR TOXIC SUBSTANCES ON THIS SITE. IF ANY SUBSTANCES ARE FOUND, THE METHODS FOR DISPOSAL SHALL ADHERE TO COUNTY, STATE, OR FEDERAL LAW.
12. THERE ARE NO KNOWN BURIAL SITES FOUND ON THIS SITE.
13. ALL PUBLIC STREETS SHALL CONFORM TO FAIRFAX COUNTY AND/OR VIRGINIA DEPARTMENT OF TRANSPORTATION (VDOT) STANDARDS AND SPECIFICATIONS UNLESS MODIFIED AS DESCRIBED HEREIN. PRIVATE STREETS SHALL CONFORM TO STANDARDS SET BY THE FAIRFAX COUNTY PUBLIC FACILITIES MANUAL SECTION 7 UNLESS MODIFIED HEREIN.
14. IN ACCORDANCE WITH PARAGRAPH 4 OF SECTION 16-403 OF THE ZONING ORDINANCE, MINOR MODIFICATIONS TO THE SIZE, DIMENSIONS, FOOTPRINTS, AND LOCATION OF BUILDINGS, PARKING SPACES, GARAGES AND SIDEWALKS MAY OCCUR WITH FINAL ENGINEERING AND DESIGN.
15. THERE ARE NO DESIGNATED FLOOD PLAINS, ENVIRONMENTAL QUALITY CORRIDORS, OR RPAs ON THE SUBJECT SITE PER FAIRFAX COUNTY MAPS.
16. THERE ARE NO SCENIC ASSESTS OR NATURAL FEATURES ON THE SUBJECT SITE WHICH WOULD DESERVE PROTECTION OR PRESERVATION.
17. THERE IS AN EXISTING WMATA SUB-STATION BUILDING ON THIS SITE THAT IS NOT IMPACTED BY THIS APPLICATION AND IS TO REMAIN.
18. THE ON-SITE AMENITIES APPROVED WITH THIS DEVELOPMENT SHALL INCLUDE:
    - * WALKING/BIKE TRAILS
    - * PLAZA RECREATION AREA
    - * PEDESTRIAN SIDEWALKS
    - * WMATA PARKING GARAGE AND RELATED FACILITIES
19. THE DEVELOPMENT SCHEDULE SHALL BE DETERMINED BY THE APPLICANT BASED UPON MARKET CONDITIONS.
20. THE PROPOSED PUBLIC ROAD IMPROVEMENTS ILLUSTRATE THE REQUIRED IMPROVEMENTS IN GENERAL ACCORDANCE WITH THE COMPREHENSIVE PLAN AND ARE SHOWN PER VDOT STANDARDS EXCEPT AS MODIFIED HEREIN. THE APPROVAL OF THIS PLAN WILL ONLY BIND THE OWNER TO CONSTRUCTING THOSE ROAD IMPROVEMENTS SHOWN ON THE FINAL SITE PLAN AND CONSTRUCTED IN ACCORDANCE WITH THE ACCOMPANYING PLANS/PROFFERS.
21. SIGNAGE WILL BE PROVIDED IN ACCORDANCE WITH THE FAIRFAX COUNTY ZONING ORDINANCE. UNLESS MODIFIED BY A COMPREHENSIVE SIGN PLAN.
22. THE LANDSCAPING AND STREETSCAPE CONCEPTS SHOWN ON SHEETS 9-15 OF THIS PLAN ARE FOR ILLUSTRATIVE PURPOSES ONLY, PROVIDED THAT THE QUANTITY AND QUALITY OF PLANTINGS ARE IN GENERAL CONFORMANCE WITH THOSE SHOWN HEREON.
23. THE BUILDING FOOTPRINTS ON THE CDP/FDP ARE CONCEPTUAL AND SUBJECT TO CHANGE AT THE TIME OF FINAL ENGINEERING IF IN SUBSTANTIAL CONFORMANCE WITH THE CDP/FDP.
24. TABULATIONS FOR SITE, BUILDING, PARKING AND LOADING DATA ARE PROVIDED ON SHEET #4 OF THIS PLAN.
25. AS PART OF SITE PLAN APPROVAL FOR THE PROPOSED DEVELOPMENT, THE APPLICANT SHALL RESERVE FOR FUTURE DEDICATION FOR PUBLIC STREET PURPOSES THE RIGHT-OF-WAY AND RELATED EASEMENTS FOR THE ROAD IMPROVEMENTS SHOWN ON THIS DEVELOPMENT PLAN. DEDICATION AND CONSTRUCTION OF THE ROAD IMPROVEMENTS SHOWN HEREON SHALL BE COMPLETED IN ACCORDANCE WITH THE PHASING PLAN SET FORTH HEREIN AND THE ACCOMPANYING PROFFERS.

STORMWATER MANAGEMENT NARRATIVE

THE CURRENT USE OF THIS SITE IS IMPERVIOUS, ASPHALT SURFACE PARKING FOR THE ADJACENT DUNN LORING METRO STATION. THE EXISTING SITE IS APPROXIMATELY 83% IMPERVIOUS AREA. THE DEVELOPMENT WITH THIS PLAN ONLY SLIGHTLY INCREASES THE IMPERVIOUS AREA, TO APPROXIMATELY 85% IMPERVIOUS AREA. AS SHOWN ON SHEET 31, AN UNDERGROUND STORMWATER MANAGEMENT FACILITY IS PROPOSED TO ACCOMODATE THE INCREASED STORMWATER RUNOFF. THE UNDERGROUND FACILITY HAS BEEN ROUGHLY SIZED IN ACCORDANCE WITH THE VIRGINIA STORMWATER MANAGEMENT HANDBOOK (SEE COMPUTATIONS ON SHEET 32). FULL SWM DETAILS AND COMPUTATIONS WILL BE PROVIDED AT THE TIME OF FINAL SITE PLAN.

BEST MANAGEMENT PRACTICES NARRATIVE

THIS DEVELOPMENT IS CLASSIFIED AS A REDEVLOPMENT IN ACCORDANCE WITH SECTION 6-400 OF THE FAIRFAX COUNTY PUBLIC FACILITIES MANUAL. THUS, THE REQUIRED REDUCTION IN PHOSPHORUS LOADS WILL BE CALCULATED AS FOLLOWS:

% P REMOVAL = [1-0.9(Cpre/Cpost)] x 100
= [1-0.9(0.90/0.90)] x 100
= 10% P REMOVAL

INNOVATIVE BMP MEASURES WILL BE UTILIZED TO SATISFY THIS REQUIREMENT. A POSSIBLE UNDERGROUND BMP FACILITY HAS BEEN ROUGHLY SIZED AND SHOWN ON SHEET 31. DETAILS AND SIZING FOR AN INNOVATIVE BMP HAVE BEEN PROVIDED ON SHEET 33 TO SHOW ADEQUACY. THE APPLICANT RESERVES THE RIGHT TO CHANGE THE SPECIFIC TYPE OF BMP AT THE TIME OF FINAL SITE PLAN IN CONFORMANCE WITH THE PUBLIC FACILITIES MANUAL.

OUTFALL NARRATIVE

THE EXISTING SITE IS CURRENTLY DEVELOPED AS LARGE SURFACE PARKING LOTS FOR THE METRO RAIL SYSTEM. THE EXISTING DEVELOPED CONDITION DRAINS THE SITE TO EXISTING CATCH BASINS THROUGHOUT THE SITE. RAINFALL ON THE PROPOSED DEVELOPMENT WILL BE MANAGED USING ADEQUATELY DESIGNED CATCH BASINS AND CLOSED CONDUIT SYSTEMS. THE SITE WILL OUTFALL THROUGH THE EXISTING CLOSED CONDUIT SYSTEM.

ALONG THE NORTHWESTERN PROPERTY LINE THE SITE OUTFALLS THROUGH TWO EXISTING CONCRETE PIPES INTO AN EXISTING CONCRETE CHANNEL. AN ADDITIONAL CONCRETE PIPE ALONG THE NORTHWESTERN PROPERTY LINE OUTFALLS INTO THE THE SAME CHANNEL, FURTHER DOWNSTREAM, WHERE THE LINING IS RIP-RAP. THIS CHANNEL ULTIMATELY OUTFALLS INTO LONG BRANCH. APPROXIMATELY 1400 FEET DOWNSTREAM OF WHERE THE CHANNEL ENTERS LONG BRANCH, THE STREAM IS CONSIDERED FLOODPLAIN WITH A DRAINAGE AREA OF 1.08 SQUARE MILES.

ALONG THE SOUTHERN PROPERTY LINE THE SITE OUTFALLS INTO AN EXISTING CLOSED CONDUIT SYSTEM. ULTIMATELY THIS CLOSED CONDUIT SYSTEM OUTFALLS INTO AN EXISTING TRIBUTARY LEADING TO LONG BRANCH. JUST NORTH OF THE INTERSECTION OF PROSPERITY AVE. AND ROUTE 50. APPROXIMATELY 1500 FEET DOWNSTREAM THE TRIBUTARY MEETS LONG BRANCH. THIS OUTFALL IS DOWNSTREAM ALONG LONG BRANCH FROM THE NORTH SITE OUTFALL; THEREFORE THE FLOODPLAIN DRAINAGE AREA IS SIGNIFCANTLY LARGER THAN 1 SQUARE MILE.

AT BOTH OUTFALL POINTS INTO LONG BRANCH AND LONG BRANCH TRIBUTARY, THE CHANNEL APPEARS TO BE IN GOOD CONDITION WITH NO VISIBLE SIGNS OF EROSION.

DESCRIPTION

T.M. #049-1-013-0017A & T.M. #049-1-013-0018A

ALL THOSE CERTAIN PIECES OR PARCELS OF LAND, TOGETHER WITH THE BUILDINGS AND IMPROVEMENTS THEREON, LYING, SITUATE AND BEING IN FAIRFAX COUNTY, VIRGINIA, MORE PARTICULARLY DESCRIBED BY METES AND BOUNDS AS FOLLOWS:

BEGINNING AT A POINT ON THE SOUTHWEST CORNER OF THE LAND HEREIN DESCRIBED, SAID POINT BEING ON THE SOUTHERN RIGHT-OF-WAY LINE OF INTERSTATE ROUTE 66 (I-66), EASTBOUND LANES AND THE NORTHERN RIGHT-OF-WAY OF PROSPERITY AVENUE, ROUTE 6066, WIDTH VARIES, AS SHOWN ON PLAT RECORDED IN DEED BOOK 7767 AT PAGE 226 AMONG THE LAND RECORDS OF FAIRFAX COUNTY, VIRGINIA; THENCE DEPARTING SAID POINT AND RUNNING WITH THE SOUTHERN LINES OF SAID I-66 THE FOLLOWING COURSES AND DISTANCES

NORTH 67°49'50" EAST 261.51 FEET TO A POINT; THENCE
NORTH 78°35'20" EAST 101.79 FEET TO A POINT; THENCE
NORTH 57°04'20" EAST 101.79 FEET TO A POINT; THENCE
NORTH 67°49'50" EAST 173.82 FEET TO A POINT; THENCE DEPARTING THE SOUTHERN RIGHT-OF WAY LINE OF SAID INTERSTATE 66
SOUTH 05°11'45" WEST 246.26 FEET TO A POINT ON THE NORTHERN RIGHT-OF WAY LINE OF PROSPERITY AVENUE; THENCE RUNNING WITH THE NORTHERN LINE OF SAID PROSPERITY AVENUE
NORTH 89°50'47" WEST 4.00 FEET TO A POINT; THENCE
NORTH 84°47'49" WEST 366.10 FEET TO A POINT; THENCE
201.17 FEET ALONG THE ARC OF A CURVE TO THE LEFT, HAVING A RADIUS OF 437.00 FEET AND A CHORD BEARING AND DISTANCE OF SOUTH 82°00'54" WEST 199.40 FEET TO THE POINT OF BEGINNING CONTAINING 57,719 SQUARE FEET OR 1.32505 ACRES, MORE OR LESS.

49-1((13))-17A	13,074	0.300	PDC	DB 07767 PG 0226
49-1((13))-18A	44,645	1.025	PDC	DB 07767 PG 0226
TOTALS	670,081	15.383		

EXISTING SITE AREA	15.383 AC. (670,081 S.F.)
EXISTING ZONE	PRM, PDC
PROPOSED ZONE	PRM, PDC
LANDSCAPED OPEN SPACE REQUIRED–PARCELS 49-2((1))-13A, 15A, & 27A (20% OF G.S.A.)	2.81 AC (122,472 SF)
LANDSCAPED OPEN SPACE REQUIRED–PARCELS 49-1((13))-17A & 18A (20% OF G.S.A.)	0.27 AC (11,544 SF)
LANDSCAPED OPEN SPACE PROVIDED–PARCELS 49-2((1))-13A, 15A, & 27A (20% OF G.S.A.)	2.81 AC (122,472 SF)
LANDSCAPED OPEN SPACE PROVIDED–PARCELS 49-2((1))-17A & 18A (20% OF G.S.A.)	0.27 AC (11,544 SF)
PROPOSED BUILDING GROSS FLOOR AREA	SEE CHART ON THIS SHEET
MAX. FAR IN PRM DISTRICT	3.0
PROPOSED FAR IN PRM DISTRICT	1.37** (917,373/670,081)
MAXIMUM BUILDING HEIGHT IN PRM DISTRICT	NO MAXIMUM
PROPOSED BUILDING HEIGHT IN PRM DISTRICT	SEE CHART ON THIS SHEET

A BULK PLANE REQUIREMENT DOES NOT APPLY TO THE PRM ZONE.

MAX FAR ALLOWED PER COMPREHENSIVE PLAN		
BASE @ 2.25 FAR FOR 8 ACRES	784,080 GFA	
17% BONUS DENSITY FOR ADU'S	133,293 GFA	
CELLAR SPACE	PER GRADE PLANE CALCULATION	
TOTAL FAR ALLOWED:	917,373 GFA + CELLAR SPACE	
MAXIMUM FAR PROPOSED		
SECONDARY USE BASE		125,000 SF
RESIDENTIAL		792,373 SF
RESIDENTIAL AMENITIES (CELLAR)		15,000 SF
RESIDENTIAL MECH./STORAGE (CELLAR)		10,000 SF
TOTAL		942,373 SF
RESIDENTIAL		
MAX. NO. OF UNITS PROPOSED	720 RESIDENTIAL UNITS	
MIN. NO. OF UNITS PROPOSED	550 RESIDENTIAL UNITS	
AVERAGE UNIT SIZE (GROSS)	1000 SF – 1128 SF	

BUILDING DATA CHART

BUILDING	USE	MAX. FLOORS	MAX. BUILDING HEIGHT
A	MULTI-FAMILY WITH GROUND FLOOR SECONDARY USES	11	135'
B	MULTI-FAMILY WITH GROUND FLOOR SECONDARY USES	11	110'
C	MULTI-FAMILY WITH GROUND FLOOR SECONDARY USES	11	110'
D	WMATA PARKING STRUCTURE WITH GROUND FLOOR SECONDARY USES	7	80' (60' WITHIN 100' OF I-66 R.O.W.)
E	SECONDARY USE	2	40'
F	SECONDARY USE	2	40'

PARKING/LOADING COMPUTATIONS

MAX. REQUIRED PARKING:
MULTI-FAMILY RESIDENTIAL, 720 UNITS (1.6 SP/UNIT) = 1,152 SPACES
+SECONDARY USES, 125,000 GSF (4.0 SP/1000 GSF) = 500 SPACES
+WMATA GARAGE SPACES = 2,000 SPACES
= 3,652 REQUIRED SPACES

MAX. PROPOSED PARKING:
MULTI-FAMILY RESIDENTIAL = 1,152 SPACES (720 UNITS)
+SECONDARY USES = 538 SPACES
+WMATA GARAGE SPACES = 2,000 SPACES
= 3,690 PROVIDED SPACES ***

REQUIRED LOADING:
MULTI-FAMILY RESIDENTIAL, 700,000 GSF (1/25,000 + 1/100,000) = 8 SPACES
+SECONDARY USES, 125,000 GSF (1/10,000 + 1/15,000) = 9 SPACES
=17 SPACES CALCULATED
MAXIMUM REQUIREMENT PER Z.O. SECTION 11-202.15 = 5 SPACES PER USE
=> 10 REQUIRED LOADING SPACES

PROVIDED LOADING:
= 10 LOADING SPACES TO BE PROVIDED (SEE MODIFICATION REQUEST ON SHEET 1) ***

***NOTE: PARKING AND LOADING SPACES WILL BE PROVIDED GENERALLY AS SHOWN. IF NOT SHOWN HEREON, LOADING SPACE WILL BE PROVIDED IN GARAGE. APPLICANT RESERVES THE RIGHT TO ADJUST THE NUMBER AND/OR LOCATION OF THE PARKING AND/OR LOADING SPACES AT TIME OF FINAL SITE PLAN, SO LONG AS THE MINIMUM NUMBERS OF SPACES ARE PROVIDED IN ACCORDANCE WITH ARTICLE 11 OF THE FAIRFAX COUNTY ZONING ORDINANCE AND/OR ANY APPROVED MODIFICATIONS THEREOF.

BUILDING A AT PROSPERITY
(NOT TO SCALE)

PRM SITE TABULATIONS**:

SITE AREA = 612,362 SF. (NOT INCLUDING PDC/FDPA 88-P-030) OR 14.06 AC
MAX. AREA OF 2.25 FAR (PER COMPREHESIVE PLAN) = 348,480 OR 8.0 AC

ALLOWABLE PER COMP. PLAN = (348,480 * 2.25 FAR) = 784,080 GFA
ADU BONUS DENSITY (17%) = 133,293 GFA
917,373 GFA + CELLAR SPACE

**APPLICATION PROPERTY EQUALS 15.383 ACRES, OF WHICH 14.06 ACRES ARE ZONED PRM. THE PRM DISTRICT PERMITS UP TO A 3.0 FAR; HOWEVER, THE COMPREHENSIVE PLAN RESTRICTS THE ALLOWABLE FAR TO 2.25 OVER 8 ACRES OF THE APPLICATION PROPERTY. ACCORDINGLY, THE TABULATIONS ON THIS SHEET DEMONSTRATE COMPLIANCE WITH THE PRM DISTRICT REGULATIONS OVER 14.06 ACRES, AS WELL AS COMPLIANCE WITH THE COMPREHENSIVE PLAN GUIDANCE.

AFFORDABLE HOUSING TABULATION (ADUS)

1. ASSUMPTIONS: THE COMP. PLAN CALLS FOR DUNN LORING METRO DEVELOPMENT WITH AN FAR OF 2.25 FAR UP TO 8 ACRES, WITH THE 17% BONUS DENSITY FOR PROVIDING ADUS. THE PROPOSED DEVELOPMENT HAS AN FAR OF 2.25 (784,080/348,480) ON UP TO 8 AC AS ALLOWED IN THE COMPREHENSIVE PLAN.

2. COMPUTATIONS OF DENSITY:
(SIZE OF SITE * FAR)–SECONDARY USES=MAX ALLOWABLE RESIDENTIAL GFA

UPPER END:
(348,480 SF * 2.25)–125,000 SF = 659,080 GFA

(659,080 SF/1,128 AVG. UNIT SIZE) = 584 UNITS = 73 DU/AC. @ 8 AC.

LOWER END:
(348,080 SF * 1.00)–125,000 SF = 223,080 GFA

(223,080 SF/1,128 AVG. UNIT SIZE) = 198 UNITS = 25 DU/AC. @ 8 AC.

UPPER END OF DENSITY RANGE = 73 DU/AC.
LOWER END OF DENSITY RANGE = 25 DU/AC.

3. COMPUTATIONS OF DENSITY FOR DEVELOPMENT:

UPPER END OF ADJUSTED DENSITY RANGE: 85
LOWER END OF ADJUSTED DENSITY RANGE: 29

$$\frac{73 - 25}{85 - 29} = \frac{48}{56} = 0.86 * 5\% = 4.30\%$$

4.30% * 720 = 31 ADUS

ADU CALCULATION RESULTS:
RESIDENTIAL IS COMPRISED OF A MAX OF 720 MULTI-FAMILY DWELLING UNITS WITH AN AVERAGE SQUARE FOOTAGE OF 1,128, OF WHICH 31 ADUS WILL BE PROVIDED.

PLANTING SPECIFICATIONS

1. Quality Assurance:

   a. Landscape planting and related work shall be performed by a firm with a minimum of five years experience specializing in this type and scale of work.

   b. Applicable Specifications and Standards:

      Fairfax County Zoning Ordinance, American Joint Committee on Horticultural Nomenclature, American Standard for Nursery Stock, latest edition.
      American Association of Nurserymen
      Landscape Specification Guidelines for Baltimore Washington Metropolitan Areas, latest edition, Landscape Contractors Association.

2. Submittals: Submit the following to the Owner's Representative prior to beginning work:

   Copies of manufacturer's data for all materials required.
   Samples of required mulch material.
   Chemical and mechanical analysis and samples of all existing soil, topsoil, organic matter and soil mix to be used.
   Planting schedule showing the dates (earliest and latest) proposed for each type of plant specified, schedule each type of planting within the normal planting seasons for such work. Include requests for any proposed changes in the approved planting season and a list of proposed sources for all plant materials.
   List of proposed sources for all plant material.

3. Delivery, Storage and Handling:

   a. Deliver packaged materials in manufacturer's unopened containers or bundles, fully identified with name, brand, type, weight, and analysis. Store packaged materials in such a manner as to prevent damage or intrusion of foreign matter.

   b. Dig balled and burlapped (B& B) plants with firm, natural balls of earth, of a diameter not less than that shown on the plant list nor less than recommended by the American Standard for Nursery Stock, and of sufficient depth to include the fibrous and feeding roots. B&B plants will not be accepted if the ball is cracked or broken before or during planting operation.

   c. Deliver trees and shrubs after preparations for planting have been completed. Do not bend, bind, or tie trees or shrubs in such a manner as to damage bark, break branches or destroy natural shape. If planting is delayed more than 6 hours after delivery, set trees and shrubs in shade, protect from weather and mechanical damage, and keep roots moist by heeling-in bare root stock and covering plant balls with soil, peat moss or other acceptable material for balled stock. Plants shall be kept well watered and shall not remain unplanted for longer than ten (10) days after delivery.

   d. Plants shall be lifted and handled from the bottom of the ball only.

   e. Do not remove container-grown stock from containers until planting time.

4. Before planting, determine that areas to receive plant material have adequate subdrainage.

   a. The landscape contractor is responsible for drainage tests as necessary to identify any problems prior to beginning planting operations. Upon commencement of planting operations the landscape contractor assumes responsibility for soil conditions.

   b. Dig planting pits to full depth and dimensions indicated on drawings.

   c. At bottom of planting pit, excavate rectangular pit 12 inches by 12 inches by 18 inches deep. Quickly pour water into small pit to a depth of 6 inches (approximately 3-3 3/4 gallon). Note time required for water to be completely absorbed. Divide time noted by 6 to achieve average rate of absorption for 1 inch of water. Where rate of absorption exceeds 60 minutes per inch, notify owner immediately for directions on how to proceed.

5. Planting shall be done only within the following dates except as approved by Owner.

   a. Deciduous Trees and Shrubs: March 1 to May 31 and October 15 to December 15.

   b. Evergreen Trees, Shrubs and Vines: March 1 to May 31 and September 1 to November 15.

6. All plant material shall be guaranteed by the Contractor for a period of 1 year from the date final acceptance to be in good, healthy and flourishing condition.

7. Materials for Planting:

   a. Mulch shall be double shredded hardwood bark. Submit sample for approval. Material shall be mulching grade, uniform in size and free from foreign matter.

   b. Leaf Compost shall be screened and free of trash.

   c. Coir Mesh (geo-textile blanket) shall be natural fiber geo-textile woven mesh composed of 100% coir (spun from coconut fiber) yarn, containing 45% Lignin and 55% Cellulose. Opening in the mesh shall be 1 inch square (nominal) by .3 inches thick. Yarn count per yard shall be 42 warp x 37 weft. Fabric tensile strength shall be 432 lb/ft x 138lb/ft

   d. Twelve-inch hardwood stakes shall be Eco-STAKES by North American Green or equal.

   e. Fertilizer shall be commercial fertilizer for ornamental trees, shrubs and ground cover. Fertilizer shall be provided in accordance with the recommendations of the soil tests. As a basis for bidding, Contractors shall assume a fertilizer with an analysis of 10% Nitrogen, 6% Phosphoric and 4% Potassium. This fertilizer shall be granular with a minimum of 50% of the total Nitrogen in organic form.

   f. Topsoil: If required; shall be a fertile, friable natural loam, uniform in composition, free of stones, lumps, plants and their root debris and other extraneous matter of 1" in diameter, and capable of sustaining vigorous plant growth. Topsoil shall have a pH range of 6.0 to 6.5, with a pH range of 5.0 to 5.5 for plants requiring acid soils. Contractor shall have soil tested at an approved agricultural laboratory, and submit results and recommendations for acceptance by the Owner before providing topsoil. Topsoil shall be free of plants, plant parts, weeds, noxious pests, eggs or larvae and shall have healthy, well-developed root systems. They shall be free from stones or other extraneous matter and shall not contain toxic substances or any material or substance which may be harmful to plant growth or human or animal life or have a dimension greater than 3/4 inch.

   g. Compost shall be fine bark. Fines shall be approved composted ground pine bark, turning the material into a dark brown and fine consistency.

   h. Soil Mix shall consist of 3/4 existing soil and 1/4 composted pine bark fines or other approved organic matter, by volume.

8. Plant Materials (Refer to the PLANT LIST on the drawings for specific types and quantities of plants):

   a. Plants shall be nursery grown in accordance with good horticultural practices. Plant material shall not be dug from the wild or collected from native stands. Plant material shall not be obtained from local nurseries and/or others, which have soil (heavy clay) and climatic conditions similar to those in the locality of the project. Plant material grown in sandy, well-drained soil will not be approved for this project.

   b. Plants shall be true to species and variety and unless specifically noted otherwise, all plants shall be of specimen quality, exceptionally heavy, symmetrical, tightly-knit plants, so trained or favored in their development and appearance as to be superior in form, number of branches, compactness and symmetry.

   c. Plants shall be sound, healthy and vigorous, well branched and densely foliated when in leaf, free of

   d. Trees, which have a damaged or crooked leader, or multiple leaders, unless specified in the plant list, will be rejected. Trees with abrasion of the bark, sun scald, disfiguring knots, or pruning cuts more than 1 1/4 inch diameter which have not completely callused, will be rejected.

   e. Plants shall conform to measurements specified in the plant schedules except that plants larger

      increase the contract price. If larger plants are accepted, the root ball shall be sized for the larger plant.

   f. Caliper Measurement: Shall be taken at a point on the trunk 6 inches above natural ground line for trees up to 4 inchs diameter, and at a point 12 inchs above the natural ground line for trees over 4 inches diameter.

   g. Plants shall be measured when branches are in the normal position. Height and spread dimensions specified refer to the main body of the plant and not from branch tip to tip.

9. Preparation of Areas for Planting:

   a. Stake out all plant material beds and tree locations for approval of Landscape Architect or owner prior to any bed preparation.

   b. Shrubs, Shrub Beds and Hedges on slopes of 3:1 or less: Loosen soil in the area of entire plant bed or hedgerow to a depth of 6 inches minimum with a rototiller. Add soil amendments and rototill again to a depth of 6 inches. Excavate plant pit and hedge trenches a minimum of 12 inches wider than the root ball or bare root on all sides. The depth shall be sufficient to allow shrub to sit 2 inches above finished grade.

   c. Shrub Beds on Slopes of Greater than 3:1: Amend soil as above. Spread coir mesh across entire area of shrub bed in steep slope area per manufacturer's specifications. Excavate plant pit through coir mesh a minimum of 12 inches wider than the root ball or bare root on all sides. The depth shall be sufficient to allow shrub to sit 2 inches above finished grade.

   d. Ground Covers and Seasonal Plantings: Loosen soil to a depth of 6 inches minimum with a rototiller. Add amendments to the soil and/or specified planting soil mix and rototill again to a depth of 6". Install plants directly into prepared bed, and firm the soil mix around them.

   e. Groundcover on Slopes of Greater than 3:1: Amend soil as above or by hand as required. Spread leaf compost to 2 inches in depth immediately prior to placing coir mesh. Spread coir mesh across entire area of groundcover bed in steep slope area per manufacturer's specifications. Each ground cover shall be placed in an individual planting pit planted through the biodegradable netting.

   f. Trees: Excavate plant pit walls vertical and scarify sides. Plant pit depth shall be sufficient to allow 2 inch maximum of root ball to be above finished grade. Tree pit shall be 12 inches wider than the ball on all sides.

10. Erosion Control Material and Planting on Steep Slopes

    a. Material meeting the requirements of the specifications shall be installed and maintained on the designated areas as shown and specified. The areas to be covered shall be prepared and fertilized as specified before the erosion material is placed. Immediately prior to the planting operations, the material shall be laid evenly, smoothly and in contact with the soil throughout.

    b. Lay erosion control materials with one inch nominal openings in accordance with manufacturer's instructions. Unroll in direction of water flow. Overlap sheets by at least 6 inches. Where strips are to be spliced lengthwise, overlap strips by 8 inches. Upgrade section shall be on top of all splices.

    c. The Contractor shall maintain and protect the erosion control material until the final inspection. Maintenance shall consist of repairs made necessary by erosion, wind or any other cause. Following the restoration of damaged areas under plant and turf guarantee and establishment requirements for applicable underlying items; the erosion control material shall be repaired or replaced to meet the original requirements and maintained until the final inspection.

11. General Plant Installation:

    a. Excavation: Excavate all tree pits and planting areas to the width and depth shown in the planting details.

    b. Center plant in pit and orient for the best visual effect. Set plants plumb and hold rigidly in position until soil has been tamped firmly around root ball.

    c. Mix soil amendments and fertilizers with existing soil in accordance with soil recommendations for plant type, based upon soil test results as approved by Owner. Delay mixing of fertilizer if planting will not occur within a few days.

    d. Backfill pit with planting soil mix, consisting of 2/3 existing soil and 1/3 organic material, and fertilizer, until two-thirds full. Tamp and water each layer thoroughly to settle soil. After soil settles, fill pit with remaining planting soil mix, water and shape surface so that it slopes to drain from trunk and matches ground at edge of planting pit.

    e. Mulch within 48 hours after planting and after applying the pre-emergent herbicide, except ground cover areas (which shall have organic material placed before planting) with a 2" layer of mulch immediately after planting. All bed lines shall be cut with a smooth consistent edge to a minimum depth of 3 inches. Keep mulch out of the crowns of shrubs and off buildings, sidewalks, light standards, and other structures.

    f. All planting areas to conform to specified grades after full settlement has occurred and mulch has been applied. Provide saucers around tree pits as shown on planting details. Remove all tags, labels, strings, etc. from all plants.

12. Permanent Seeding or Sodding for Grass Areas:

    a. Lawn Seed or Sod varieties shall be an improved variety turf-type tall fescue blend. The landscape contractor shall select from varieties approved by the Maryland or Virginia Department of Agriculture.

    b. Refer to the Virginia Erosion and Sediment Control Handbook, for guidelines, specifications and installation techniques of seed and sod.

14. Maintenance shall begin immediately after each plant and lawn area is installed and shall continue until 90 days after final acceptance of the last section.

UNDERGROUND SWM WAIVER

County of Fairfax, Virginia

MEMORANDUM

DATE: August 24, 2006

TO: Jonathan Papp, Staff Coordinator
Zoning Evaluation Division
Department of Planning and Zoning

FROM: Jeremiah Stonefield, Chief Stormwater Engineer
Site Review East, Environmental and Site Review Division
Department of Public Works and Environmental Services

SUBJECT: Dunn Loring Metro Station, RZ 2005-PR-039, concurrent with PCA 88-P-030, Conceptual/ Final Development Plan, Land Unit A, Dunn Loring - Merrifield Metro Station, dated July 7, 2006 (Plan),Tax Map #049-1-01-0027, 13-0017-A, 0018-A, 049-2-01-0013-A, and 0015-A (Site), Providence District

REFERENCE: Waiver #0378-WPFM-001-2, for location of Underground Facilities in a Residential Area

We have reviewed the referenced submission for consistency with Section 6-0303.8 of the Public Facilities Manual (PFM), which restricts use of underground stormwater management facilities located in a residential development (Attachment B). The Board of Supervisors (Board) may grant a waiver after taking into consideration possible impacts on public safety, the environment, and the burden placed on prospective homeowners for maintenance. Underground stormwater management facilities located in residential developments allowed by the Board:

- shall be privately maintained;
- shall be disclosed as part of the chain of title to all future owners responsible for maintenance of the facilities;
- shall not be located in a County storm drainage easement; and,
- shall have a private maintenance agreement, in a form acceptable to the Director of the Department of Public Works and Environmental Services (DPWES), executed before the construction plan is approved.

The applicant has indicated that the preferred method for stormwater management includes use of one underground detention vault and one underground StormFilter™ system.

The applicant has provided construction cost estimates of the stormwater facilities for the development comprised of at least 2000 parking spaces for WMATA, a minimum of 550 to a total maximum of 720 residential units, and a minimum of 80,000 square feet to a maximum 105,000 square feet of secondary/retail uses to be served by the underground facilities.

Department of Public Works and Environmental Services
Land Development Services, Environmental and Site Review Division
12055 Government Center Parkway, Suite 535
Fairfax, Virginia 22035-5503
Phone 703-324-1720 • TTY 703-324-1877 • FAX 703-324-8359

ANALYSIS:
An analysis of the possible impacts on public safety, the environment, and the burden placed on prospective home owners for maintenance is as follows:

Impacts on Public Safety – The proposed underground vaults are proposed to be located in the paved on-site access road. With respect to safety, a proposed facility within a paved parking lot or next to a street or travel lane is viewed differently than a facility located in a grassy open space area. Parking and travelway areas are places where children are less likely to play and gain unauthorized access to the facilities. Locking manholes and doors must be provided at each access point.

If it is the intent of the Board to approve the waiver request, the applicant shall provide liability insurance in an amount acceptable to Fairfax County as a waiver condition. A typical liability insurance amount is $1,000,000 against claims associated with underground facilities. The private maintenance agreement shall also hold Fairfax County harmless from any liability associated with the facilities.

Impacts on the Environment – The surrounding areas are developed and the proposed underground facilities will outfall into an existing piped storm drainage system. Therefore, staff does not believe that there will be any adverse impact on the environment from the proposed underground facilities.

Burden Placed on Prospective Homeowners for Maintenance and Future Replacement – The proposed development is for construction of a minimum of 550 and a total maximum of 720 residential units, in addition to the WMATA parking and retail uses. The applicant has indicated the annual routine maintenance burden will be assumed by an Umbrella Owners Association (UOA) or similar entity. A maintenance agreement must be executed prior to site plan approval. Staff recommends that the maintenance responsibility be shared among all owners within the development. The estimated annual maintenance cost provided by the applicant, in current dollars is $30,400 for the underground detention facility and the StormFilter™ BMP facility. Staff recommends that the applicant, prior to site plan approval, escrow monies for a 20-year maintenance cycle of the underground facilities for the residential portion of the maintenance responsibility to the UOA. These monies must not be made available to the UOA until after final bond release.

The applicant should also be required, as a waiver condition, to address future replacement of the underground facilities as part of a private maintenance agreement with the County. In order to maximize the useful life of underground facilities and minimize maintenance issues, Staff recommends that, if it is the intent of the Board to grant the waiver, then the applicant must be required to construct the underground facilities with reinforced concrete products only. The applicant has estimated the total construction costs for the underground detention and water quality control facilities at approximately $352,000. The amount of the annual contribution by the UOA toward the replacement reserve fund for both the residential and non-residential portions of the site, assuming interest compensates for inflation, would be $7,040. The replacement reserve fund must be separate from the annual maintenance fund to ensure the monies are available at the time replacement is required and have not been previously spent on maintenance activities.

The applicant has indicated that the distribution of the maintenance responsibility among all of the property owners has not been finalized. The proposed development consists of WMATA,

residential units and retail uses. An UOA, or similar entity, will be formed to provide for the maintenance and future replacement of the facilities. The applicant states that, at this point, the actual percent interest of each owner has not been finalized, and that the negotiations are not expected to be concluded until after the Rezoning has been approved. However, recognizing that the Board is concerned with the burden placed on future homeowners, the applicant's engineer has indicated in a letter dated August 4, 2006, that the burden for maintenance and replacement of the facilities will not exceed $35 per residential unit per year. The proffers must include a commitment to limit the contributions from the individual residential units to the maintenance and future replacement funds.

Staff recommends that, if it is the intent of the Board to grant the waiver, the applicant be required to establish a financial plan for the operation, inspection, maintenance and future replacement of the underground facilities. The applicant should be required to establish, as part of the UOA documents, a reserve fund to cover future replacement of the facilities, based on the initial construction costs, an estimated 50-year lifespan (for concrete products).

The applicant must also provide that disclosure will be made in the chain of title of the homeowners' responsibility for maintenance and the associated waiver conditions.

RECOMMENDATION:
DPWES recommends that the Board approve the waiver to locate underground facilities in a residential area for the Land Unit A, Dunn Loring – Merrifield Metro Station development plan, subject to Waiver #0378-WPFM-001-2 Conditions dated August 24, 2006, as contained in Attachment A.

If you have any questions, or need further assistance, please contact me at 4-1720.

Waiver # 0378-WPFM-001-2 Conditions

Land Unit A, Dunn Loring - Merrifield Metro Station
RZ 2005-PR-039
August 24, 2006

1. The underground facilities shall be constructed in accordance with the development plan, these conditions and as determined by the Director of the Department of Public Works and Environmental Services (DPWES).

2. The underground facilities shall be located under the travel lanes or private streets and not within the open space areas of the proposed development, as determined by DPWES.

3. The underground facilities shall be constructed of reinforced concrete products only and incorporate safety features, including locking manholes and doors, as determined by DPWES at the time of construction plan submission.

4. The underground facilities shall be privately maintained and shall not be located in a County storm drain easement.

5. A private maintenance agreement, as reviewed and approved by the Fairfax County Attorney's Office, shall be executed and recorded in the Land Records of the County. The private maintenance agreement shall be executed prior to final plan approval.

   The private maintenance agreement shall address:
   - County inspection and all other issues as may be necessary to insure that the facilities are maintained by the property owners (e.g. Umbrella Owners Association) in good working condition acceptable to the County so as to control stormwater generated from the development of the site.
   - A condition that the applicant, property owners, their successors or assigns shall not petition the County to take future maintenance or replace the underground facilities.
   - Establishment of a reserve fund, for future replacement of the underground facilities.
   - Establishment of procedures to follow to facilitate inspection by the County, i.e. advance notice procedure, whom to contact, who has the access keys, etc.
   - A condition that the property owners provide and continuously maintain, liability insurance. The typical liability insurance amount is at least $1,000,000, against claims associated with underground facilities.
   - A statement that Fairfax County shall be held harmless from any liability associated with the facilities.

Attachment A
0378-WPFM-001-2

6. Operation, inspection and maintenance procedures associated with the underground facilities shall be incorporated in the site construction plan, private maintenance agreement, and umbrella owner association documents which insure safe operation, inspection and maintenance of the facilities.

7. A financial plan, for the umbrella owner association, to finance regular maintenance and full life cycle replacement costs, shall be established prior to final subdivision plat approval. A separate a line item in the umbrella owner association annual budget for operation, inspection and maintenance shall be established. A reserve fund for future replacement of the underground facilities shall also be established to receive annual deposits from the members of the umbrella owners association based on the initial construction costs and an estimated 50-year lifespan for concrete products.

8. Prior to final construction plan approval, the applicant shall escrow sufficient funds for the benefit of the umbrella owner association which will cover a 20-year maintenance cycle of the underground facilities. These monies shall not be made available to the umbrella owner association until after final bond release.

9. All future purchasers of any of the residential units shall be advised prior to entering into a contract of sale, as well as within the recorded umbrella owner association documents, that the umbrella owner association is responsible for the operation, inspection, maintenance and replacement of the underground facilities.

10. The owner and its successors and assigns shall disclose, as part of the chain of title, to all future property owners, the presence of the underground stormwater facilities and the umbrella owner association's responsibility for operation, inspection, maintenance and replacement of such facilities, by including the following language within the deed for each lot and the record plat:

    "The owner and its successors and assigns are responsible for the operation, inspection, maintenance and replacement of the underground stormwater facilities as set forth in the umbrella owners association documents and a private maintenance agreement entered into with the County." 03-07-06

MINIMUM STORMWATER INFORMATION FOR REZONING, SPECIAL EXCEPTION, SPECIAL PERMIT AND DEVELOPMENT PLAN APPLICATIONS

The following information is required to be shown or provided in all zoning applications, or a waiver request of the submission requirement with justification shall be attached. Note: Waivers will be acted upon separately. Failure to adequately address the required submission information may result in a delay in processing this application.

This information is required under the following Zoning Ordinance paragraphs:

Special Permits (8-011 2J & 2L)	Special Exceptions (8-011 2J & 2L)
Cluster Subdivision (8-610 1G & 1H)	Commercial Revitalization District (8-808 2A (10) & (11))
Development Plans PRC District (16-302 3 & 4L)	PRC Plan (16-303 1E & 10)
PDP P Districts (except PRC) (16-502 1F & 10)	Amendments (18-202 10F & 10)

☑ 1. Plat is at a minimum scale of 1"=50' (unless it is depicted on one sheet with a minimum scale of 1"=100').

☑ 2. A graphic depicting the stormwater management facility(ies) and limits of clearing and grading accommodate the stormwater management facility(ies), storm drainage pipe systems and outlet protection, pond spillways, access roads, site outfalls, energy dissipation devices, and stream stabilization measures as shown on Sheet 39.

☑ 3. Provide:

Facility Name/ Type & No.	On-site area served (acres)	Off-site area served (acres)	Drainage area (acres)	Footprint area (sf)	Storage Volume (cf)	If pond, dam height (ft)
UNDERGROUND DETENTION (1-5 year, & 100 year, underground facility)	14	0	14	300	2500	N/A
Totals						

☑ 4. Onsite drainage channels, outfalls and pipe systems are shown on Sheet 39.
Pond inlet and outlet pipe systems are shown on Sheet 39.

☑ 5. Maintenance access (road) to stormwater management facility(ies) are shown on Sheet 39.
Type of maintenance access road surface noted on the plat is asphalt (asphalt, geoblock, gravel, etc).

☑ 6. Landscaping and tree preservation shown in and near the stormwater management facility is shown on Sheet N/A (UNDERGROUND)

☑ 7. A 'stormwater management narrative' which contains a description of how detention and best management practices requirements will be met is provided on Sheet 1.

☑ 8. A description of the existing conditions of each numbered site outfall extended downstream from the site to a point which is at least 100 times the site area or which has a drainage area of at least one square mile (640 acres) is provided on Sheet 1.

☑ 9. A description of how the outfall requirements, including contributing drainage areas of the Public Facilities Manual will be satisfied is provided on Sheet 1.

☑ 10. Existing topography with maximum contour intervals of two (2) feet and a note as to whether it is an air survey or field run is provided on Sheets 1 & 3.

☑ 11. A submission waiver is requested for N/A

☑ 12. Stormwater management is not required because N/A

Water Quality Control Narrative

See SWM and BMP Narrative on Sheet 1.

Watershed Data

Part 1 List All of the Subareas and "C" Factors Used in the BMP Computations.

Subarea Designation and Description (1)			"C" (2)	Acres (3)
S1 Onsite	StormFilter #1	Controlled	0.90	3.85
UC Onsite	Developed	Uncontrolled	0.83	10.15

NOTE: "C" Factors developed using % Imperviousness for existing and proposed conditions.

Phosphorus Removal

Part 2 Compute the Weighted Average "C" Factor For the Site.

(A) Area of Site (a) 14.0 acres

(B) Subarea Designation and Description (1)			"C" (2)	x	Acres (3)	=	Product (4)
S1 Onsite	StormFilter #1	Controlled	0.90	x	3.85	=	3.47
UC Onsite	Developed	Uncontrolled	0.83	x	10.15	=	8.42

(b) Total = 11.89

(C) Weighted average "C" factor (b) / (a) =(c) 0.85

Part 3 Compute the Total Phosphorus Removal for the Site.

Subarea Designation (1)	BMP Type (2)	Removal Eff. (%) (3)		Area Ratio (4)	"C" Factor Ratio (5)		Product (6)
S1 Onsite	StormFilter1	50	x	0.28 x	1.06	=	15
UC Onsite	Developed	0	x	0.73 x	0.98	=	0

(A) Total Phosphorus Removal (a) Total 15%

Part 4 Determine Compliance with Phosphorus Removal Requirement.

(A) Select Requirement (a) 10%

Water Supply Overlay District (Occoquan) 50 %
Chesapeake Bay Resourse Preservation Area (New Development) 40 %
Chesapeake Bay Resourse Preservation Area (Redevelopment) 10 %
[1-0.9 x ("I"pre / "I"post)] x 100
[1-0.9 x (0.795/ 0.841)] x 100 = 14

(B) If Line 3 (a) is greater than or equal to Line 4 (a), then the Phosphorus removal requirement is satisfied. Line 3 (a) 15 >= Line 4 (a) 10

StormFilter Sizing Computations

3.85 ACRES TO BE TREATED
FLOW TO BE TREATED= (3.85 AC)(0.35 IN/HR)(0.83) = 1.12 CFS
NUMBER OF CARTRIDGES=(1.12 CFS)(449/15)=34 CARTRIDGES

8x18 PRECAST STORMFILTER CAN CONTAIN UP TO 35 CARTRIDGES.

* THESE SIZING COMPUTATIONS ARE PRELIMINARY AND WILL BE ADJUSTED AT THE TIME OF FINAL SITE PLAN PER FAIRFAX COUNTY PFM REQUIREMENTS AND IN COORDINATION WITH THE PRODUCT MANUFACTURER.

GENERAL NOTE:

THE UNDERGROUND BMP DEVICES SHOWN ARE PRELIMINARY. CHANGES TO THE BMP'S FOR THE SITE MAY BE IMPLEMENTED AT THE TIME OF FINAL SITE PLAN TO MEET THE FAIRFAX COUNTY PFM REQUIREMENTS.

STORMFILTER MAINTENANCE NOTE:

THE STORMFILTER DEVICES SHALL BE PRIVATELY MAINTAINED IN ACCORDANCE WITH THE FOLLOWING GUIDELINES. THE OWNER SHALL CONTRACT WITH THE MANUFACTURER TO PROVIDE THE NECESSARY MAINTENANCE OR PERFORM THE REQUIRED MAINTENANCE INDEPENDENTLY.

STORMFILTER CONSTRUCTION NOTE:

PROPER SEQUENCE OF CONSTRUCTION IS IMPERATIVE TO THE PROPER FUNCTIONALITY OF THE STORMFILTER UNITS. CONTRACTOR MUST ADHERE TO THE MANUFACTURER'S CONSTRUCTION GUIDELINES SHOWN ON THIS SHEET.

GENERAL NOTES

1) STORMFILTER BY STORMWATER360 (5360), PORTLAND, OREGON (800) 548-4667.
2) FILTER CARTRIDGE(S) TO BE SIPHON-ACTUATED AND SELF-CLEANING. STANDARD DETAIL DRAWING SHOWS MAXIMUM NUMBER OF CARTRIDGES. ACTUAL NUMBER REQUIRED TO BE SPECIFIED ON SITE PLANS OR IN DATA TABLE BELOW.
3) PRECAST VAULT TO BE CONSTRUCTED IN ACCORDANCE WITH ASTM C857 AND C858. DETAIL DRAWING REFLECTS DESIGN INTENT ONLY. ACTUAL DIMENSIONS AND CONFIGURATION OF STRUCTURE WILL BE SHOWN ON PRODUCTION SHOP DRAWING.
4) STRUCTURE AND ACCESS COVERS TO MEET AASHTO H-20 LOAD RATING.
5) STORMFILTER REQUIRES 2.3 FEET OF DROP FROM INLET TO OUTLET. IF LESS DROP IS AVAILABLE, CONTACT 5360.
6) INLET AND OUTLET PIPING TO BE SPECIFIED BY ENGINEER AND PROVIDED BY CONTRACTOR. PRECAST STORMFILTER VAULT EQUIPPED WITH EITHER CORED OPENINGS OR KNOCKOUTS AT INLET AND OUTLET LOCATIONS.
7) PROVIDE MINIMUM CLEARANCE FOR MAINTENANCE ACCESS. IF A SHALLOWER SYSTEM IS REQUIRED, CONTACT 5360 FOR OTHER OPTIONS.
8) ANTI-FLOTATION BALLAST TO BE SPECIFIED BY ENGINEER AND PROVIDED BY CONTRACTOR, IF REQUIRED. BALLAST TO BE SET ALONG ENTIRE LENGTH OF BOTH SIDES OF THE STRUCTURE.
9) ALL STORMFILTERS REQUIRE REGULAR MAINTENANCE. REFER TO OPERATION AND MAINTENANCE GUIDELINES FOR MORE INFORMATION.

GENERAL STORMFILTER NOTES:

1.) STORMGATE BY STORMWATER MANAGEMENT, INC., PORTLAND, OREGON (800-548-4667).
2.) ALL WATER QUALITY FACILITIES REQUIRED REGULAR MAINTENANCE. MINIMUM ANNUAL MAINTENANCE INCLUDES INSPECTION OF COMPONENTS AND REMOVAL OF SEDIMENTS. FOLLOW ALL LOCAL, STATE, & FEDERAL SAFETY GUIDELINES.
3.) PRECAST CONCRETE VAULT CONSTRUCTED IN ACCORANCE WITH ASTM C858.
4.) EXTERNAL PIPING AND COUPLINGS PROVIDED BY OTHERS.
5.) FLEXIBLE COUPLINGS TO BE SET 18" OUTSIDE FACE OF WALL. FERNCO OR ENGINEER APPROVED.
6.) SEE PRECAST STORMGATE DATA BLOCK FOR VAULT SIZE AND WEIR SETTING.
7.) ANTI-FLOATATION BALLAST TO BE SET ALONG ENTIRE LENGTH OF BOTH SIDES OF VAULT, IF REQUIRED. SEE PRECAST STORMGATE DATA BLOCK SHEET FOR BALLAST WIDTH AND HEIGHT DIMENSIONS.
8.) CONTRACTOR TO ADJUST WEIR TO DESIGN ELEVATION.
9.) WHEN SETTING SCREWS ON WEIR PLATE DO NOT EXCEED 5.0 FT-LBS TOURQUE.
10.) SEAL WEIR WITH SILICONE SEALANT AFTER FINAL ADJUSTMENT.

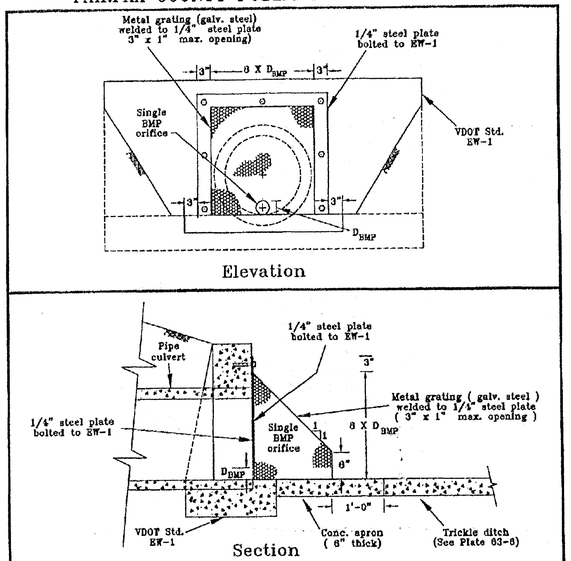
FAIRFAX COUNTY PUBLIC FACILITIES MANUAL



Notes:
1) Alternative cage configurations are acceptable as long as the flow velocity thru the cage at the max BMP pool elev is less than 0.15 FPS
2) This detail (metal grating and steel plate) may be applied directly against rectangular risers.
3) For larger cages (height > 5') a 3' X 2' hinged gate with locking mechanism shall be installed on the front face of the cage.
