OUTFALL AND EXTENT OF REVIEW NARRATIVE

THE INTENT OF THIS PROJECT IS THE CONSTRUCTION OF A MIXED USE BUILDING AND ASSOCIATED ONSITE INFRASTRUCTURE. THE ENTIRE 1.61 ACRE SITE WILL BE DISTURBED. THE EXISTING TOWN CENTER PARKWAY SWM POND BUILT WITH FFX COUNTY PLAN # 5734-PI-01 WILL BE USED FOR STORMWATER DETENTION. A WAIVER WILL BE SUBMITTED FOR ONSITE STORMWATER MANAGEMENT.

THE SITE IS LOCATED WITHIN THE HUNTER MILL DISTRICT. IT IS BORDERED BY THE EMERY RUCKER SHELTER AND RESTON REGIONAL LIBRARY TO THE NORTH, NEW DOMINION PARKWAY TO THE SOUTH, A VACANT PARCEL TO THE EAST AND EXPLORER STREET TO THE WEST. THERE ARE MULTI-FAMILY HOMES TO THE WEST. A CHILDCARE FACILITY CURRENTLY OCCUPIES THE SITE. THE SITE DRAINS PRIMARILY FROM EAST TO WEST WITH SLOPES RANGING BETWEEN 3% AND 20%, WITH MOST SLOPES AROUND 5%.

OUTFALL

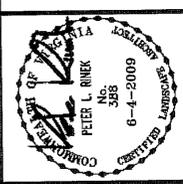

APPROXIMATELY 1.61 ACRES LEAVES THE SITE AND OUTFALLS INTO EXISTING STRUCTURE 24. AN ADDITIONAL 11.49 ACRES IS PIPED INTO EXISTING STRUCTURE 24 FROM THE EAST FOR A TOTAL DRAINAGE AREA OF 13.1 ACRES TO EXISTING STRUCTURE 24. THE RUNOFF IS THEN PIPED TO EXISTING STRUCTURE 20. AT THAT STRUCTURE, AN ADDITIONAL 19.2 ACRES IS PIPED IN FROM THE SOUTH. SINCE 19.2 ACRES IS GREATER 90% OF THE 13.1 ACRES COMING FROM STRUCTURE 24, THE EXTENT OF REVIEW IS SATISFIED PER PFM 6-0203-2A AND WILL BEGIN AT EXISTING STRUCTURE 20 AND WILL END 150' DOWNSTREAM.

CONCLUSION

THE STORM SEWER FROM EXISTING STRUCTURE 20 FLOWS IN A 5'X8' BOX CULVERT NORTH TO THE INTERSECTION OF BOWMAN TOWNE DRIVE AND EXPLORER STREET WHERE IT THEN FLOWS WEST TO THE INTERSECTION OF TOWN CENTER PARKWAY. THE FLOW HERE IS PICKED UP BY TWIN 66" PIPES THAT OUTFALL TO THE EXISTING TOWN CENTER PARKWAY SWM POND (FFX PLAN #: 5734-PI-01). THE TOTAL DRAINAGE AREA TO THE OUTFALL IS APPROXIMATELY 169 ACRES WHICH IS GREATER THAN 100 TIMES THE SITE AREA (100 * 1.61 ACRES = 161 ACRES).

THERE IS A MINOR INCREASE IN THE 2 AND 10 YEAR FLOWS FROM THE DEVELOPMENT TO THE EXISTING STORM SEWER SYSTEM. THE EXISTING STORM SEWER IS ADEQUATE TO HANDLE THE POST-DEVELOPMENT FLOWS. (SEE COMPUTATIONS ON THIS SHEET) CONSIDERING THAT OFFSITE POND PROVIDES SWM AND BMP'S AND THAT THE EXISTING STORM SEWER IS ADEQUATE TO RECEIVE THE RUNOFF FROM THIS DEVELOPMENT, IT IS THE OPINION OF THE ENGINEER THAT AN ADEQUATE OUTFALL IS PROVIDED. THERE IS NO INCREASE IN RUNOFF TO THE ADJOINING PROPERTIES AND NO BUILDINGS WILL BE IMPACTED BY THE 100 YEAR OVERLAND RELIEF FLOW.

PER THE NORTHERN VIRGINIA BMP HANDBOOK, A WET POND THAT PROVIDES A PERMANENT WET STORAGE OF 4.0 TIMES THE VOLUME OF RUNOFF FROM THE MEAN STORM EVENT IS CREDITED WITH A 50% PHOSPHORUS REMOVAL RATE. THE CALCULATIONS SHOWN BELOW ARE PROVIDED TO SHOW THAT THE EXISTING TOWN CENTER PARKWAY POND WAS DESIGNED TO HAVE A WET STORAGE GREATER THAN 4 TIMES THE RUNOFF FROM THE MEAN STORM EVENT. THEREFORE, THE POND PROVIDES BMP'S FOR THE DRAINAGE SHED.

Verbatim Excerpts

CP-86-C-121-12 - WINK DEVELOPMENT, L.L.C.

Administrative Review During Commission Matters

Commissioner Palatiello: The second Concept Plan is filed by Wink Development. This is a proposal for a two story child care center. This is on Explorer Drive, or Explorer Street and New Dominion Parkway within Reston Town Center. This is bordered by the County facility that is a homeless shelter and the Library, and is bounded on the South by New Dominion Parkway. Again, this application has been before the Planning and Zoning Committee in Reston. It has their approval. The applicant has made some modifications pursuant to the recommendations of the Planning and Zoning Committee. We had an issue that took some time to work through with regard to landscaping, screening and the fence. I was concerned - wanted to make sure that we had a fence height and a fence location that protected the children at this child care center. New Dominion Parkway will be a major thoroughfare when it is soon extended and will intersect and have an at-grade intersection with the Fairfax County Parkway and I wanted to make sure that extra precaution was made with regard to fencing the play area at the child care center to make certain that every precaution was made to preclude any ability for the children to get out of that play area and out onto that busy street, and I'm satisfied that that has been done. Mr. Chairman, with that I would MOVE THAT THE PLANNING COMMISSION APPROVE CONCEPTUAL PLAN 86-C-121-12 BY WINK DEVELOPMENT, L.L.C.

Commissioner Byers: Second.

Chairman Murphy: Seconded by Mr. Byers. Is there a discussion of that motion? All those in favor of the motion to approve CP-86-C-121-12, say aye.

Commissioners: Aye.

Chairman Murphy: Motion carries.

(The motion carried unanimously with Commissioners Alcorn, Coan, Downer and Kelso absent from the meeting; Commissioner Wilson not present for the vote.)

Reston Town Center Rezoning

- A. RZ 85-C-088 (Property A)
- B. RZ 86-C-121 (Property B)
- C. RZ 86-C-118 (Property C)

Revised February 27, 1987

Pursuant to Section 15.1-491 (a) of the Code of Virginia (1950, as amended) and Section 18-203 of the Zoning Ordinance of Fairfax County (1978, as amended), the property owner and Applicant, for itself and its successors or assigns (hereinafter collectively referred to as the "Applicant") proffer that the development of the parcels under consideration, (a) shown on Fairfax County Tax Map 17-1-((1))-3 and 17-2-((1))-11 (hereinafter collectively referred to as "Property A"), (b) shown on Fairfax County Tax Map 17-1-((1))-3, 17-2 ((1))-11 (Part 13), 17-1-((1))-3 (Part 6), 17-3-((1))-1, 2, 3, 17-3-((1))-4, 5, 5C, 5D, 5E, 6, 14, 15 and 17-4 ((1))-7 (hereinafter collectively referred to as "Property B"); and (c) shown on Fairfax County Tax Map 17-1-((1))-3 (hereinafter collectively referred to as "Property C"); will be in accordance with the following conditions. These proffered conditions will be effective only if the Property is rezoned in accordance with the Applicant's request, provided however Applicant will accept I-3 rezoning on Property C in lieu of I-5.

A. DEFINITIONS

TOWN CENTER: - The 530.74 acre land area described in Appendix A.; the land area owned by Applicant in February 1982 plus land owned by others within the general boundaries of the Dulles Airport Access Road on the south, the proposed Fairfax Parkway on the west, Stevenage Drive on the north and Reston Avenue on the east with some land (as shown on plats filed with this Application) also east of Reston Avenue.

- 1 -

TOWN CENTER STUDY AREA: - The 448.96 acre land area described in Appendix A; the land area in Town Center owned by Applicant in February 1982 (excluding land owned by others but including land already zoned).

TOWN CENTER CORE AREA: - Property "A", 84.25 acres of the Town Center included in RZ 85-C-088.

MAXIMUM DEVELOPMENT PROGRAM: - The maximum amount of development which will be allowed in the Town Center Study Area (448.96 acres including those areas already zoned) to a commercial floor area ratio of .43 (calculated based on the aforesaid gross acreage) including the following elements:

<u>Commercial</u>	
Office/Research and Development	7,100,000 sq. ft.
Retail	315,000 sq. ft.
Hotel	1,000,000 sq. ft.
Total Commercial	8,415,000 sq. ft.
Commercial Floor Area Ratio	.43
<u>Housing Units</u>	
	1,400 dwelling units (minimum)
<u>Hospital</u>	
	127 beds (minimum)

Since the Town Center Study Area includes land which is not part of the four rezoning applications under consideration, the amount of development which will be allowed on Properties A, B, C and the land included in RZ-C-119 hereinafter referred to as Property D, will be the amount which remains after deducting the amount of commercial development which occurs on those portions of the Town Center Study Area not presently under consideration.

MINIMUM DEVELOPMENT PROGRAM: - The minimum amount of development that will be allowed based on Applicant's proposed transportation plan is as follows:

<u>Commercial</u>	
Office/Research and Development	5,500,000 sq. ft.
Retail	315,000 sq. ft.
Hotel	1,000,000 sq. ft.
Total Commercial	6,815,000 sq. ft.
Commercial Floor Area Ratio	.35

- 2 -

<u>Housing Units</u>	1,400 dwelling units (minimum)
<u>Hospital</u>	127 beds (minimum)

PHASING: - The development programs assume that the only variable is the office/research and development (hereinafter referred to as R&D) component. The phasing is therefore related to the amount of office/R&D space constructed. The phasing is:

Phase	Cumulative Office/Research & Development
Phase I-A	2,300,000 square feet
Phase I-B	4,300,000 square feet
Phase I-C	5,500,000 square feet
Phase II	6,300,000 square feet
Phase III	7,105,000 square feet

SUPERBLOCK The land included within the boundary of Reston Avenue, Baron Cameron Avenue, proposed Fairfax Parkway and the Dulles Toll Road.

TRANSPORTATION PLAN: - The transportation plan dated July, 1986 was prepared for Applicant by JHK and Associates. The transportation plan is a comprehensive regional analysis which includes Property A, Property B, Property C, Property D and those other properties, as defined in Appendix A as the Town Center Study Area, as internal traffic generators. The balance of Properties in the Town Center Area, including the Fairfax County North Governmental Center, have been included in the regional growth predictions and are included as part of the background traffic.

TRANSPORTATION COORDINATOR: - A Transportation Coordinator will be employed within sixty days of the issuance of the first building permit on Property A or of the issuance of the first building permit in the Town Center Study Area which will bring the cumulative commercial development up to one million square feet pursuant to this application, whichever event occurs first. The Coordinator will be responsible for working with public and private transportation agencies and for developing the Transportation System Management (TSM) program for the Town Center.

- 3 -

TRANSPORTATION COORDINATION COMMITTEE: - A TSM Coordinating Committee for Reston will be initiated by Applicant. Employers in Reston will be represented on the committee. The committee will meet regularly and will promote the TSM programs. The committee will work with local transportation committees and to the extent possible coordinate activities.

TRANSPORTATION SYSTEM MANAGEMENT: - A program designed to reduce vehicular trips upon maximum build-out of the Town Center Study Area by approximately 25% below the office related trip generation rates, defined in the ITE Trip Generation Manual 3rd Ed. dated 1982. Table 1, attached hereto, shows the PM office trip generation rates and the targeted levels of reduction for each phase.

INTERNAL TRAFFIC STUDY: - The traffic studies to be conducted at the completion of construction of Phases I-A and I-B to determine Applicant's performance of its trip generation rate goals for the purpose of adjusting the TSM programs. The methodology for these studies is defined in Appendix B.

COMPREHENSIVE TRAFFIC STUDY: - The traffic study to be conducted at the completion of construction of Phase I-C, Phase II, and if desired by Applicant, at completion of construction of Phase III to measure both the internal trip generations as well as the growth in the external traffic via cordon line counts as defined herein. This will be the basis for determining the actual development levels for Phases II and III. The methodology for these studies is defined in Appendix B.

CORDON LINE: - The imaginary line immediately outside the Superblock where traffic will be counted to measure total traffic volume. The cordon line counts will be taken immediately outside the boundaries of the superblock; north of Baron Cameron, east of Reston Avenue, south of Sunset Hills Road and west of the proposed Fairfax Parkway. The intersections at which the cordon line counts will be taken are: (a) Baron Cameron Avenue/Reston Avenue, (b) Reston Avenue/Temporary Road, (c) Reston Avenue/Sunset Hills Road, (d) Sunset Hills Road/Fairfax Parkway, (e) Fairfax Parkway/Baron Cameron Avenue, (f) Baron Cameron Avenue/Bennington Woods Road and (g) Baron Cameron Avenue/Bracknell Drive.

FDOT: - Fairfax County Office of Transportation

VDOT: - Virginia Department of Transportation or its successor.

B. TRANSPORTATION SYSTEM

1. Applicant proffers to implement a TSM program which is intended to reduce by approximately 25 percent office related trips as defined in the ITE Trip Generation Manual. The program shall be designed to produce a 5 percent reduction at the completion of construction of Phase I-A, a 15 percent reduction at the completion of Phase I-B, a 19.4 percent reduction at the completion of construction of Phase I (A, B, & C), a 22.2 percent reduction at the completion of Phase II and a 25 percent reduction at the completion of Phase III. For Phases I-A and I-B, Applicant will be considered as having reached its TSM Goal if the rate is within 2 percent of the targeted reduction. For Phases I-C, II and III, Applicant will be considered as having obtained its TSM Goal if it is within 3 percent of its target. The TSM program components are listed in Appendix D.

2. Upon completion of construction of Phase I-A the Applicant will cause to be prepared and submitted to the FDOT an internal traffic study which will fully describe the traffic characteristics of the developed portions of the Town Center Study Area. The method for conducting this traffic study shall be as described in Appendix B attached hereto. Following review of the traffic study the TSM program for Phase I-B will be adjusted and approved by the FDOT.

3. Upon completion of construction of Phase I-B the Applicant will conduct another internal traffic study. Following review by the FDOT, the TSM program for Phase I-C will be further adjusted as approved by FDOT.

4. Phase I (A, B, and C) will not exceed 5.5 million square feet of office and/or R&D uses. Subject to the results of comprehensive traffic studies, Phase II may increase the total office/R&D use to 6.3 million square feet.

- 5 -

Subject to the results of a second comprehensive traffic study, Phase III may increase the total office/R&D use to 7.1 million square feet. The TSM program in its entirety will be continued after the Town Center build-out notwithstanding that Phases II and/or III may not be completely developed (i.e. if the buildout is 5.5 million square feet, the TSM programs will target a goal of a 19.4 percent reduction.) Applicant will perpetuate the TSM programs by appropriate written agreements with third parties to and including but not limited to lease agreements, covenants and/or operation and management of same by the Property Owners Association to be created per Section C, Paragraph 8.6 on page 17 of these proffers. Applicant may further adjust the TSM programs to find the most cost-effective solutions as long as the trip generation reductions are maintained, subject to FDOT approvals. In the event that following buildout of 7.1 million square feet of office and/or R&D Applicant fails to continue the TSM programs as previously approved by FDOT and Applicant's trip generation reductions are no longer met, Fairfax County may issue no further non-residential use permits until the TSM programs are again successfully implemented.

5. Cordon Analysis. Applicant will conduct a comprehensive traffic study upon completion of construction of Phase I-C, which will include detailed surveys of individual development sites to determine trip generation characteristics, as well as traffic counts at a cordon line immediately surrounding the Superblock. For study purposes, an imaginary cordon line will be established immediately outside the Superblock for the purpose of counting traffic which is generated by or passes through the Superblock. Traffic counts will consist of the outbound PM traffic movements counted at the public street intersections within the cordon line surrounding the Superblock. These are: (a) Baron Cameron Avenue/Reston Avenue, (b) Reston Avenue/Temporary Road, (c) Reston Avenue/Sunset Hills Road, (d) Sunset Hills Road/Fairfax Parkway, (e) Fairfax Parkway/Baron Cameron Avenue, (f) Baron Cameron Avenue/Bennington Woods Road and (g) Baron Cameron Avenue/Bracknell Drive. Traffic counts will be compared to the numbers as forecast in Table 4.

6. The cordon analysis will be submitted to the Fairfax County Board of Supervisors and FDOT for administrative review and approval. The volume of

traffic counted crossing the cordon will be compared with the number of trips estimated for that time period. The methodology for determining the estimated number of trips at any time is described in Appendix C. If the actual and estimated number of trips counted is within five percent of the forecast number, Applicant will be permitted to complete the buildout of Phase II of Town Center Study Area. If the actual number of trips exceeds the forecast number by more than five percent, Applicant proffers to reduce the development in Phase II by an amount of development equivalent to the difference between the actual number and estimated number of trips divided by the difference between 14,885 trips and the estimated number of trips multiplied by 800,000 square feet as adjusted below. If the actual number of trips exceeds the estimated number by more than five percent and if the traffic studies show that Applicant has met its estimates for trip generation, then the Applicant will be allowed to discount half of the effect of the increased external traffic in the above calculations. (An example of the applications of this formula is shown in Table 2, attached hereto. The method for determining the estimated number of trips at any time is defined in Appendix C.) If the actual number of trips crossing the cordon line exceeds the estimated number (14,885) by more than five percent and the traffic studies show Applicant has not met its estimates for trip generation, Applicant will not be issued any additional building permits for office and/or R&D use so long as the actual number of trips crossing the cordon line exceeds the estimated number (14,885) by more than five percent and the estimates for trip generation have not been met.

7. Upon completion of construction of Phase II (as adjusted), Applicant will conduct another comprehensive traffic study including a cordon analysis. Following review of this study by the FDOT and a comparison of the number of trips counted at the Cordon Line with the estimated number of trips, the proportion of remaining development that can be completed will be calculated. Should this procedure result in permitting less than the number of square feet proposed by Applicant at build-out, the Applicant may supply additional transportation improvements, not previously proffered which would provide sufficient capacity to accommodate additional development. The capacity of such additional improvements would be determined using standard

transportation planning techniques as approved by the FDOT. Applicant may also conduct additional traffic surveys including cordon analyses at any time prior to reaching a build-out and, depending upon the results, Applicant may propose additional TSM actions and improvements which will allow for continued development not exceeding the maximum development program subject to FDOT approval. For purposes of this section, the additional capacity provided by a single arterial lane equals 1,000 vehicles per hour at the PM peak hours.

8. Fairfax Parkway (Springfield Bypass) Reservation - Subject to VDOT approval of the alignment of the Fairfax Parkway substantially consistent with the attached plats prepared by Reston Land Corporation and dated October, 1984. Applicant proffers to dedicate or convey to Fairfax County or VDOT a right-of-way 160 feet wide for the Fairfax Parkway through those portions of Reston shown on the plat. Applicant shall also reserve land at the northwest quadrant of the Fairfax Parkway and Sunset Hills Road for a northbound to westbound loop (the 4.1339 acre Parcel as shown on the attached plat as prepared by Gulf Reston, Inc., dated June 21, 1978 and numbered 84-025-5), land at the southeast quadrant of same intersection for a free flow slip ramp (in accordance with the Development Plans for RZ 86-C-121) and land at the southeast quadrant of the Fairfax Parkway and Baron Cameron for a standard diamond exit ramp (in accordance with the Development Plans for RZ 86-C-118). Applicant agrees, subject to final design approval by VDOT, to expand the reservation for the northbound to eastbound free flow slip ramp in the southeast quadrant of the Fairfax Parkway and Sunset Hills Road to conform to Byrd, Tallamy and MacDonald's design of this interchange with the Fairfax Parkway all as shown on sheets 44 and 45 of Project Number 000-029-249, PE 103 dated 3 February 1987. However, Applicant's obligation to construct any portion of the Fairfax Parkway pursuant to these proffers shall not include any grade-separated interchanges. Provided however that Applicant will cost-share with VDOT or Fairfax County the construction of grade-separated interchanges at Sunset Hills Road and/or Baron Cameron Avenue if such grade-separated improvements are made concurrent with Applicant's construction of the portions of the Fairfax Parkway which would contain the aforesaid interchanges. Applicant's

contribution to such cost-sharing shall be limited to and not exceed the cost if such intersections were built at-grade. Applicant will dedicate or convey such right-of-way within sixty days after request of the Board of Supervisors following a binding commitment of funds for construction of the segment for which right of way is requested in accordance with the attached plans.

9. Phased Transportation Improvements - Phase I. The phasing of transportation improvements will be tied to the amount of office/R&D space built in the Town Center Study Area in accordance with Table 3, attached hereto. Phase I-A shall include up to but not exceeding 2,300,000 square feet of office/R&D space in the Town Center Study Area. During development of Phase I-A, Applicant will construct, at Applicant's expense, the following road improvements: (as shown on Figure 11 of the Reston Town Center Transportation study dated July, 1986.)

- (a) a southbound to eastbound loop in the SW quadrant of Reston Avenue and the Dulles Access Road with relocation of the ramps in the SW and SE Quadrants, all subject to Federal Aviation Administration (FAA) and VDOT approval.
(b) a northbound left turn lane across the Reston Avenue Bridge over the Dulles Access Road, subject to FAA and VDOT approval.
(c) reconstruct Sunset Hills Road to a 4-lane divided section from Town Center Parkway to Herndon Town Line.
(d) widen westbound approach of Sunset Hills Road to Reston Avenue from Old Reston Avenue.
(e) East-West Connector Road as a 4-lane divided section from Reston Avenue to Alley Street and improve intersection with Reston Avenue.
(f) Vail Avenue as a 4-lane section from Reston Avenue to Alley Street and improve intersection with Reston Avenue.

14. Phase I-B Development - During Phase I-B of development, which will include up to 2,000,000 additional feet of office and/or R&D space bringing the aggregate to 4,300,000 square feet, Applicant will construct the following road improvements at Applicant's expense:

- (a) reconstruct Reston Avenue by adding one lane in each direction, from the ramps north of Dulles Airport Access Road to Temporary Road.
(b) the East-West Connector Road to a 4-lane divided section from Alley Street to Town Center Parkway.
(c) Town Center Parkway to a 4-lane divided section from Bowman Towne Drive to East-West Connector Road.
(d) reconstruct the intersection at Baron Cameron Avenue and Reston Avenue.
(e) Fairfax Parkway to a 4-lane divided facility from Sunset Hills Road to the East-West Connector.
(f) East-West Connector to a 4-lane divided facility from Town Center Parkway to the Fairfax Parkway.
(g) First Street as a 2-lane section from the East-West Connector to Bowman Towne Drive.

15. Applicant will substantially complete and place in service all of the above improvements prior to the issuance of a non-residential use permit which will raise the cumulative total of office and/or R&D space in the Town Center Study Area to 4.3 million square feet.

16. Applicant will conduct the Phase I-A internal traffic study not later than completion of 4.3 million square feet of office and/or R&D space.

17. Phase I-C Development - During Phase I-C development, which will include up to 1,200,000 additional feet of office and/or R&D space bringing the aggregate to 5,500,000 square feet, Applicant will construct the following road improvements at Applicant's expense:

- (a) a southbound lane across the Reston Avenue Bridge over the Dulles Airport Access Road between the northern and southern ramps, subject to FAA approval

- (b) a southbound auxiliary lane from Sunset Hills Road to the ramp north of the Dulles Access Road.

- (c) Fairfax Parkway to a 4-lane divided section from the East-West Connector to Baron Cameron Avenue.

18. Applicant will substantially complete and place in service the above improvements prior to the issuance of a non-residential use permit which will raise the cumulative total of office and/or R&D space in the Town Center Study Area above 5.5 million square feet.

19. Applicant will conduct the Phase I comprehensive traffic study, including a cordon count, no later than the completion of construction of 5.5 million square feet of office and/or R&D space. Pursuant to the methodology in Appendix B, the comprehensive traffic study will be subject to FDOT approval. Applicant's ability to proceed with development of Phase II will be conditioned on the results of this study and its formula analysis as set forth in Table 2. The development capacity of Phase II will be set by said formula. However, once this development capacity has been determined, Applicant may elect at its sole discretion to cease development should the allowable development capacity defined by said formula not justify the additional transportation improvements.

20. Phase II Development - During Phase II development which will include up to 800,000 additional feet of office and/or R&D space bringing the aggregate to 6,300,000 square feet, Applicant will construct the following road improvements at Applicant's expense:

- (a) Town Center Parkway as 4-lane divided section from East-West Connector to Sunset Hills Road.
(b) two additional lanes of Reston Avenue, one in either direction, from the East-West Connector to Baron Cameron Avenue.
(c) complete Vail Avenue and remainder of core area streets.

21. Applicant will substantially complete and place in service the above listed improvements prior to the issuance of a non-residential use permit

which will raise the cumulative total of office and/or R&D space in the Town Center Study Area above 6.3 million square feet, as adjusted.

22. Applicant will conduct a Phase II comprehensive traffic study including a cordon count, no later than the completion of construction of 6.3 million square feet of office and/or R&D space. Pursuant to the methodology in Appendix B, the comprehensive traffic study will be subject to FDOT approval. Applicant's ability to proceed with development of Phase III shall be conditioned on the results of this study and the formula analysis as set forth in Table 2. The development capacity of Phase III will be set by said formula. However, once this development capacity has been determined, Applicant may elect at its sole discretion to cease development should the allowable development capacity defined by said formula in its opinion not justify the additional transportation improvements.

23. Phase III Development - During Phase III development which will include up to 805,000 square feet of office space bringing the aggregate to 7,105,000 square feet, Applicant will construct the following road improvements at Applicant's expense:

- (a) First Street from Vail Avenue to Sunset Hills Road as a two-lane section.
(b) two additional lanes of the Fairfax Parkway, one in either direction from the Dulles Airport Access Road to the East-West Connector.

24. Transportation proffers are made by Applicant with the expectation and understanding that in the event right-of-way, construction or contributions toward construction of parts of the transportation improvements described in Table 3 are provided by others, Applicant will receive full benefit and credit of such contributions in furtherance of its requirements to perform under these proffers.

10. Applicant will make application to FAA (or its successors) for permission to construct those improvements which require FAA approval, concurrent with the site plan approval process for the first building in Property A but no later than December 31, 1987. These proffers are given with the expectation that FDOT and VDOT will use their best efforts to assist in obtaining such FAA approvals. Applicant shall use its best efforts to secure all required FAA approvals to and including but not limited to (1) timely filing of Final Plans (2) timely preparing and filing any Final Revisions to Final Plans and (3) timely application for all necessary construction and grading permits. If after applying for permission pursuant to the above and using its best efforts Applicant has not obtained FAA approvals within eighteen (18) months after initial application for all necessary construction and grading permits above, Applicant will inform FDOT that the approvals have not been received and then if FAA approvals are not received within the next six (6) months, Applicant will nevertheless be allowed to continue with the development of the Phase I.

11. All of the above described improvements ((except 9 (a) & 9 (b) if timely FAA approval is not received)) will be substantially completed and placed in service prior to the issuance of a non-residential use permit the which will raise the cumulative total of office and/or R&D space in the Town Center Study Area to 2.3 million square feet.

12. Applicant will conduct the Phase I-A internal traffic study no later than completion of 2.3 million square feet of office and/or R&D space.

13. Fairfax Parkway Construction - Within six months following the opening of Fairfax Parkway bridge over the Dulles Airport Access Road for traffic, Applicant will complete and place in service Fairfax Parkway as a 4-lane divided section between the north ramps of the Dulles Access road and Sunset Hills Road. Prior to the commencement of construction on this segment of the Parkway, Applicant will dedicate, or cause to be dedicated, the 160' right-of-way from Sunset Hills Road to the southern boundary of Reston as more particularly shown on the attached plats. As a part of the construction Applicant will also construct, at Applicant's expense, an at-grade signalized intersection at Sunset Hills Road and Fairfax Parkway.

25. Applicant will construct at its own expense traffic signals throughout the Town Center Superblock at such time as such signals are warranted and approved by VDOT. Such signals shall be interconnected and shall provide for efficient movement of traffic within the Town Center Study Area.

26. Applicant will make best efforts to obtain right of way needed for street widening which is not owned by Applicant. In the event Applicant is unsuccessful, Applicant will request condemnation of the same by Fairfax County at Applicant's expense. This proffer (Section B, paragraph 26) shall become null and void should Fairfax County not use its condemnation powers.

27. Notwithstanding the above adjustments in office and/or R&D development, Applicant will have rights to develop the full 315,000 or more square feet of retail, 1,000,000 square feet of hotel and 1400 or more dwelling units,

28. Applicant proffers to construct intersections in the Town Center consistent with those shown on Figure 12, Page 43, of the Transportation Plan dated July, 1986, as attached hereto. Turn lanes will be provided at such time that the contiguous approach roadway is built or when the intersection warrants signalization. Detailed engineering studies will be conducted for each intersection and should engineering or environmental factors require design modification, Applicant reserves the right to provide the equivalent needed capacity at other locations subject to VDOT and FDOT approval.

29. Applicant will reserve up to 10 feet of right of way on the north boundary of Part 13 of RZ 86-C-121 for further dedication or conveyance to Fairfax County or VDOT for widening of Temporary Road as may be required by detailed engineering, geometric design, and traffic studies and subject to VDOT approval. Applicant will reconstruct Temporary Road from Old Reston Avenue to North Shore Drive to a four-lane undivided facility if required by VDOT consistent with this reservation and subject to future traffic studies. Should VDOT not require this widening by December 31, 2000, this reservation will expire and become null and void and of no further force and effect.
